

PROJECT STATUS REPORT

Project Name SSCF Charity Resource Hub

For Week Ending 21st March, 2025 - Friday

Project Status Yellow

Status Description The project's overall status is currently yellow. From the last check-in, the team has had to do a review of the content on the website and has been doing in-depth research based on the feedback of the partner. It is **slightly behind** schedule; however, we decided to prioritize accuracy over style for this week's check in and are conducting research based on our content change. Another constraint that was limiting us was how relatively new we are to WordPress, but there is definitely a learning curve in place here. I believe we are well on the way to getting it done within the specified deadlines.

Activities—During the Past Week

- Designed a base template (header, footer) for consistency in all pages
- Discussed what possible themes and content could go on different buckets – came up with solutions for replacing the “Granting” bucket.
- Division of Labour – systematically divided labour amongst the group for the next check-in.

Activities—Planned for Next Week

- Improve further on the website – working towards the final delivery.
- Expand on content and information relevant to NorthStar customers.
- Act upon changes specified by customer during third check-in.

Project Issues

Primarily the product is lacking content and depth, which we plan to work on these coming weeks.

Project Changes

Feedback from last check in made us realize that our prototype had some serious accessibility issues, hence studied WCAG 2.1 guidelines so that website adheres to these. Colours follow a contrast ratio (foreground and background) of 3:1 consistently so far.

Scrapped “Social” bucket entirely. Moving towards a reworking of the “Granting” bucket as per feedback, and plan on delivering on the same soon. An almost complete change in content is underway.
